Abstract

PROBLEM TO BE SOLVED: To obtain a discoloration inhibitor capable of significantly controlling a discoloration phenomenon of coloring matter especially by irradiation with a fluorescent lamp and to provide a method for controlling the discoloration.

SOLUTION: This discoloration inhibitor uses rosmarinic acid. Namely, the discoloration inhibitor is characterized by comprising rosmarinic acid as an active ingredient. The method for inhibiting the discoloration is characterized by formulating an object with rosmarinic acid to make rosmarinic acid exist in the object.
